

ROOFING PRODUCTS, WEBSITES AND LOCAL INSTALLATIONS

The selected roofing material must be compatible with roofs on surrounding homes as well as the architecture of the subject house. Additionally, the roofs must include uniform tones of dark brown, dark grey or charcoal. Roofs that are monochromatic or include very disparate color intensities or shades do not comply with these criteria.

The following are a few roofing product samples that are considered a good fit with the design guidelines included in the roofing amendment.

1. CERTAINTEED PRESIDENTIAL TL www.certainteed.com
